

IMPORTANT NOTICE
2009

H1N1 HEALTH MEASUREMENTS

Newton International Kindergarten
30th of September, 2009.

Dear parents,

The October holiday is approaching and a lot of people will be traveling during the holiday.

As you are already aware, this is the flu season and we are treating the H1N1 threat with the utmost respect. We are an international school and therefore have a higher risk of attracting the H1N1 virus; this is why we have already implemented several health routines and checks to avoid the virus.

However, we need your help and understanding in ensuring a safe return back to school after the holidays.

We kindly ask all parents to observe your child's health for 3 consecutive days prior to sending him/her to Newton. Keep an eye out for any signs of the flu and please write down in the indicated form below, your child's temperature during the last 3 days before entering school.

Every parent is required to return the form to Newton Kindergarten on the first day of attendance after the holiday.

If your child has a fever of 37.5 degrees Celsius or higher, please keep him/her home for further observation and remember to inform the school.

Have a great holiday and thank you for your cooperation and understanding.

Sincerely,

Newton International Kindergarten
