Background

Newton Educational Group has more than 15 years of experience in Suzhou and aim to provide domestic and international families with the best in bilingual early childhood education!

Hui Xin campus opened on October 13th, 2014.

The campus is designed by Tsushima Design Studios, Tokyo with the philosophy of creating a natural, bright and educational learning facility with state of the art indoor lighting, windows and floors in an open structure that allow children to see the routines of every day life, such as the yellow school buses arriving through the large "glass walls" and the food being prepared in the kitchen through the glass windows.

The school has unique features such as a dry and water slide with 2 levels, a climbing wall for kids exploration, ecological gardening, a large heated indoor swimming pool, a 150 seat children's theater and a double-layered "H.C. Andersen" library, a football field with turf, golf area and an electric train that runs around campus. Our environment is loved by our students and it also shows the culture and characteristics of Newton's environmental education.

At Hui Xin Campus we pay attention to the growth of each child. Teachers and parents has a partnership of mutual respect and trust. With an international education model, professional Chinese and foreign teachers, individualized student guidance and a rich curriculum full of activities we put children's education and well-being first.

Through the Newton values of Explore – Play – Learn – Grow We enable every Newton child to open up, keep an international perspective, develop excellent all-round skills and have a healthy, happy childhood life in the company of enthusiastic and professional teachers!

Our high-end campus is a perfect symphony of nature, social harmony and cultural awareness.

Newton Philosophy

Newton Kindergarten's international and bilingual programs for domestic residents and foreign passport holders uphold a commitment to excellence in early education.

Our main principle is bilingual education and by focusing on a two language environment, Newton students is given a natural advantage in both English & Chinese from an early age.

Explore: Students are given many opportunities to explore the world that surrounds us. In the process of exploring, they learn to discover, question things and think actively. Through diverse activities, we inspire their consciousness of exploration and improve their ability to explore independently.

Play: The development of children's sensory integration is increased by games, we guide children to understand game rules, discover themselves, form a good character and learn to communicate with others and build a sense of order.

Learn: We focus on nurturing independent and confident life-long learners with curiosity and thirst for knowledge. Children are encouraged to express themselves in a variety of ways and to learn through participation and interaction.

Grow: Through exploration, play and interactive learning, children understand themselves better, build character and develop friendships and team spirit as they become independent world citizens, who are ready for the challenges of tomorrow.

Facilities

Natural colors

Nature and its colors is the best reference when creating a comfortable indoor environment. Classes include pine-wood walls, quality wooden chairs, tables & beds along with the gentle color schemes. Natural LED lights and green plants make every day, a great day in class!

Environment building

The campus is designed with open spaces and full activity areas where the concept of "total inclusion" is incorporated as children explore and play freely.
